Pokéapi
The REST and GraphQLᴮᴱᵀᴬ Pokémon API

Over **219,762,000** API calls received!

All the Pokémon data you'll ever need in one place,
easily accessible through both a modern GraphQL API and a traditional RESTful API

Check out the new GraphQL API beta!

REST (v2)

```
http://pokeapi.co/api/v2/pokemon/1
{
    "id": 1,
    "name": "bulbasaur",
    "base_experience": 64,
    "height": 7,
    "is_default": true,
    "order": 1,
    "weight": 69,
    "abilities": [
        {
            "is_hidden": true,
            "slot": 3,
```

Try it now!
